Lufthansa Technik & TU Hamburg Career Center - *Web Developer*

OCT 2021 - MAR 2022

- Worked in a group of 4 to define a framework that helps to distinguish standard/non-standard processes, which helps to merge its fragmented IT solutions.

University of Twente, the Netherlands - *Teaching Assistant*

OCT 2019 - MAR 2020 | OCT 2020 - MAR 2021

- TA for study modules "Pearls of Computer Science" and "Software Systems"

PROJECTS

NewTube - *Personal Project*

OCT 2022

- A frontend project built with ReactJS and YouTube API that let users browse, search, and watch videos.

Exercise - *Personal Project*

SEP 2022

- A frontend project built with ReactJS and Exercise DB API that let users search and browse instructive exercise videos/GIFs.

Didactic Visualization for a Searchable Encryption Scheme - *Developer & Researcher*

APR 2021 - JUL 2021

- Research about how visualization can help student study complex cryptography schemes

GUI for Parity Game Algorithm Research - *Developer & Researcher*

JAN 2021 - APR 2021

- Develop a visualization GUI of Parity Game with built-in classic algorithms for researchers and students

Logistic Dashboard, Cofano - *Developer (Data Visualization)*

APR 2019 - JUL 2019

- Develop the middleware and innovative visualizations of an information system that retrieves, stores, and visualizes data by user's choice
